

CREATE YOUR OWN GREEN UP PROJECT

What ideas do you have for improving the world?

How about:

- ▶ Starting a school garden?
- ▶ Encouraging others to boycott the use of pesticides to help save the bees?
- ▶ Creating and selling products made from recycled and up-cycled materials?
- ▶ Eliminating the use of plastic shopping bags?
- ▶ Anything else you can think of.

Here is your chance to clarify your concerns, speak your passions, and share your solutions with the world.

Simply identify a topic and take the first step in sharing your mission. Your ideas can range from specific to broad, but develop a good understanding of what how and/or who you want to help before moving forward.

The more you care about your project, the more effective you will be in helping others to care about your project, too.

Hi, I'm C S Wurzberger, The Green Up Girl®, Founder of the Green Up Kids™ Club and I'm here to engage, excite, and empower you to become a Master Change-Maker by providing you with the platform and mentoring you need to launch, manage, and grow your own Purpose-Driven Projects.

Whatever you're passionate about can be turned into a project.

Grab a pen, find a comfortable spot, and let's get started!

Identify The Issues

What issues do you see the world or your community that you want to change or improve?
